More and more pool industry professionals are looking for practical, effective solutions to the challenges posed by traditional pools.

Whether it's limited space or licensing issues, experts in this field are always searching for a complete answer to meet their clients' growing needs.

KITPOOL has the answer you've been looking for

Kitpool is the leading pool structure manufacturer nationwide.

We offer a wide selection of pool models, with various sizes, structures, and flexible options—so we can meet the needs of any client or project.

Our headquarters
are located in Spain!

We also ship to countries across Europe, the United States, and Latin America.

	7.50	€21,105.81	€21,381.12	€22,317.95

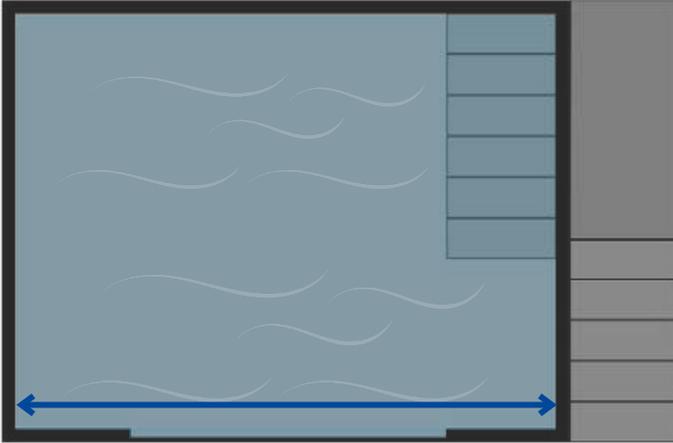

NOTE: VAT and delivery are not included in the prices shown.

Prices shown are for these exact measurements. Please note that pricing is adjusted per required centimeter.

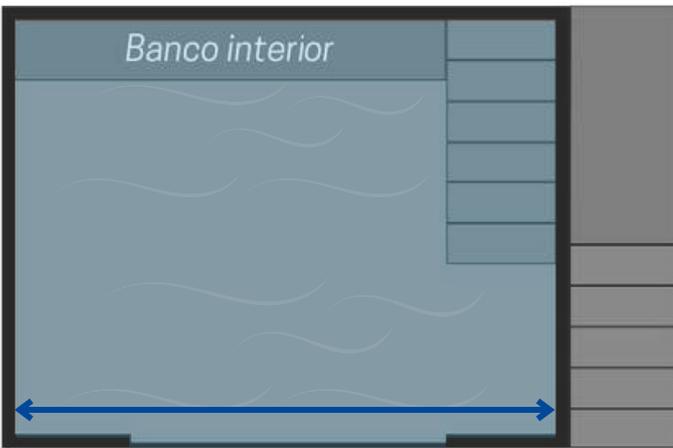

Due to shipping restrictions, the maximum size for a compact pool is 7.50 x 3m. Larger pools will need to be modular.

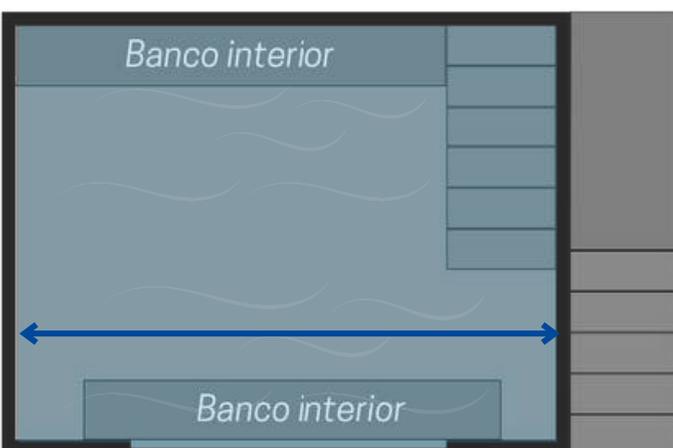

Please note:

Pools with water length UP TO 4.50 METERS don't require a bench for structural support, but you're welcome to add one as an extra if you'd like.

Pools with water length FROM 4.50 TO 5.50 METERS need one bench to reinforce the structure.

Pools with water length STARTING AT 5.50 METERS require two benches for added support due to their extended length.

*Extra benches added for structural reinforcement are considered an optional feature. They can be installed either inside or outside the pool.

For transport, the pool width cannot exceed 3 meters. So if you want to add an exterior bench, the maximum pool width allowed is 2.70 meters.

- Ultra-quiet 0.5 HP filtration pump.

Elevated in concept. Buried in style.

Enjoy all the premium features of the ELEVATED POOL, now available for your in-ground pool—excluding the glass and exterior finish.

All our pools are CE certified for European Manufacturing.

Reinforced Blade & Tech Wood

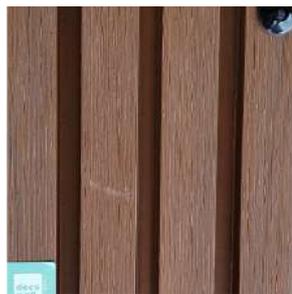

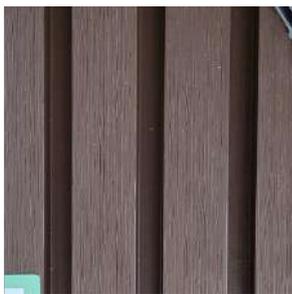

Pick from a wide
range of interior and
exterior finishes and
make it your own.

Engineered wood, also called composite wood, is a blend of recycled wood powder and advanced polymers, combined into a matrix with added stabilizers and sealants.

This composite goes through a manufacturing process with high temperatures and pressure, resulting in a tough, long-lasting material.

- ✔ Highly resistant to moisture—unlike natural wood, it won't warp, crack, or rot even with constant exposure to water.
- ✔ No need for regular sealing, painting, or chemical treatments.
- ✔ Designed to mimic the look of real wood, it offers a refined and attractive finish.
- ✔ Sustainable material that's environmentally friendly.

The sustainability behind our pools

Our company is dedicated to protecting water resources and promoting sustainable water use. That's why we explore the latest materials and components on the market and design pools where sustainability truly comes to life.

What makes our pools sustainable? There are three key reasons our pools are ECO-EFFICIENT:

Skimmer Filtration

Cleaning the Skimmer Filter saves you 94.6% more water compared to cleaning the sand filter used in traditional pools.

With Skimmer Filter filtration, your water gets 2.5 times cleaner than with a sand filter.

Reinforced Liner Finish

Thanks to the reinforced liner, you can keep the same pool water for up to 5 years: its safe material prevents the growth of fungi and microorganisms.

With a reinforced dark-colored liner, your pool water will naturally stay 2°F to 4°F warmer—no electric heater needed.

Minimal Chemicals, Easy Maintenance

We NEVER use flocculant chemicals or hibernators in our pools. All you need is the right chlorine for reinforced liners or a salt chlorinator, plus regular filtration.

Pools designed for
responsible **water**
usage.

Get yours
today!

All our pools come with the CE
European Manufacturing Certificate.

State-of-the-art technology, working for you.

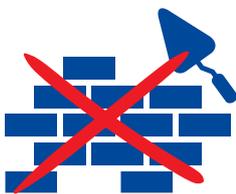

At Kitpool, we lead the way in cutting-edge pool construction technology. Our advanced robotics streamline every step of the building process, ensuring top-notch efficiency, precision, and quality for flawless results delivered fast.

Above-ground pools: a complete solution.

From our factory straight to your home, delivered as a single piece or in modular sections—it's that simple. Unlike in-ground pools, our above-ground pools don't require construction or permits, as they're classified as furniture.

WARRANTIES (Excludes Consumables)

No construction required

No permit required

Fully customizable

Every one of our pools comes with a European CE Manufacturing Certificate.

BASIC MAINTENANCE KIT

All of our pool models come with a basic maintenance kit, which includes the following items:

- ECOBASIC: drain pump, hose, pole, and battery-powered vacuum.
- POOLSPA and ELEVATED COMPACT POOLS: in addition to the items included with ECOBASIC, these also come with a curved brush, net, standard brush, and chlorine and pH test kit.
- IN-GROUND COMPACT POOLS: equipped with a sweeper, drain pump, floating hose, standard pole, and chlorine and pH test kit.
- ÁTICOPOOL, MIAMI, and SOLPOOL: do not include a maintenance kit.
