ABOUT US

PORTCRIL is a European Company established in 1996, that produces high quality Spas, SwimSpas, Steam Cabins, and Saunas.

Constant innovation drives our success in creating hydrotherapy products that contribute to the **well-being, relaxation, and quality of life of all our customers.**

We pride ourselves in accommodating customer's Individual requirements and can extensively customise all of our products accordingly – in addition to offering bespoke and exclusive designs.

We design and manufacture to the highest standards using only the best quality components. We are proud to say that all of our Portcrl Spas, Saunas, and Steam cabins are truly “Made in Europe” at our manufacturing plant in Oporto, Portugal.

LOUNGE CONCEPT

DESIGN

SPA

Lounge Concept is the PORTCRIL's **most contemporary range of spas**. The minimalist lines of these spas perfectly complements **modern architectural styles**.

Our **timeless design** allies **exceptional** comfort and relaxation with **outstanding hydromassage technology**, whilst our flexible manufacturing ethos provides a **high level of customisation** for both domestic and commercial applications.

DOUBLE

DOUBLE COMFORT, DOUBLE RELAXATION

Double Spas Range

is the latest addition to the Portcrl portfolio.

With a design focused on **soft lines and rounded edges**, these SPAS have another feature that distinguishes them: **two loungers**.

Designed for **three, five and six seats respectively**, we believe that this new range responds to the essential market demands: **ergonomics and comfort**.

SWIM SPA

A Swim Spa combines the benefits of physical exercise with warm water hydrotherapy.

The Swim Spa can be used throughout the year in any season. In addition to swimming, you can jog, or even add an underwater cycle for a complete low impact resistance work out. The non-slip floor and fully adjustable intensity level makes the Swim Spa ideal for all the family's exercise needs.

TECHNOLOGIES

**CORIL**

Coril®: a unique and patented painting technique that offers the possibility of colouring your Spa, or Hammam, with any colour (s) of the RAL Palette. Your imagination is the limit!

**INSHELL
LEDS**

The InShell Leds are a unique type of chromo-therapy, with multiple led RGB lights which are actually built in to the spa's shell. This makes your spa more pleasant and comfortable. This is a worldwide exclusive feature of Portcrl spas.

**CHROMOTHERAPY
(RBG)**

Chromotherapy, known as colour therapy is a therapeutic technique that involves using visible or non-visible properties of 3 different colours. Each emits different vibrations and possesses characteristics that can soothe, inspire, balance or change our perceptions.

**TRIPLE INSULATION**

The triple insulation consists of insulating the shell of the spa, the base and also the panels. This triple insulation is not only important to ensure a more efficient power consumption but also makes the equipment of the spa run more silently providing a more relaxing spa experience.

**OZONE**

Ozone is increasingly recognised as the principal water purifier for spa pools. Ozonators allow ozone's natural purification and oxidising qualities to be effectively harnessed in domestic spa pool environments.

**UV**

Our UV spa systems were built on a visionary model for the spa industry. The science behind our UV models was inspired by municipal drinking water treatment. As water passes through the disinfection chamber, a high intensity UV germicidal light ray targets the DNA and RNA of bacteria, viruses, algae, parasites, cysts and more.

**ECOLITE**

The Ecolite is a structure upgraded to construction in aluminum to provide maximum stability and durability to the spa and all its components.

**TURBO**

Turbo is a special feature of the spa with a unique hydraulic modification that delivers an extra powerful massage by activating the blower pump.

**TOTAL AUTO MASSAGE**

The Total Auto Massage is an automatic sequence valve system installed in the spa hydraulics. Simply select the speed, intensity, and massage pattern you require and the spa takes over, providing alternating massage pressure points across your legs, back and neck. Focused hydrotherapy or total relaxation, the choice is yours – either way we'll take your spa experience to a whole new level.

**FOUNTAIN
WATERFALL**

The Fountain Waterfall, is a smooth water stream that stimulates a deep feeling of relaxation. This feature provides a great warm feeling neck area of the user and adds excitement to the spa.

**WATERFALL**

The spa waterfall adds to the spa experience. It enhances relaxation owing to the visual and sound effects.

**iSPA**

True Wi-Fi global remote control, so whether you are in the living room at home, or boarding a plane, you are connected and in control of all the functions on your spa, ready for your return.

**AROMATHERAPY**

The spa industry's first liquid aroma injector. This patented aroma delivery mechanism puts control in the hands of the spa user by allowing calming scents to be released with the push of a button.

**FLOW
DIVERTER**

The Flow Diverter is a valve that allows the user to direct the flow of the massage pump to a special zone or seat of the spa. This great feature allows the user to balance the power of the massage in specific zones according to their taste.

**TOUCH
CONTROL**

Almost all new electronic devices today have touch screen interfaces. Now your spa can have one too! The spaTouch panel is the next breakthrough in ease of operation for spas. Its intuitive screens make controlling your spa a breeze.

OPTIONS

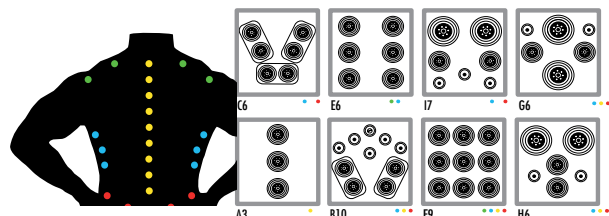

MICROSILK

MicrosilK® is a unique air therapy system which produces billions of micro-sized super oxygenated bubbles suspended as a cloud in the Spa's water. The micro-bubbles pass gently into the skin pores, carrying oxygen into the Epidermis layer. This results in many therapeutic benefits including: natural moisturising, deep cleansing, alleviation of xerosis issues, as well as simply making the skin appear younger and more vibrant. Individually, the bubbles penetrate gently into your pores for a deep skin:

Cleansing | Re-energizing | Moisturizing

PRIME, LOUNGE CONCEPT, DOUBLE

**V-JETS**

The V-Jets are an exclusive feature that allows you to choose a

jet configuration unique to your spa. The different jet panels were designed to create distinct types of massage feelings to different body zones. From stronger to more relaxing, with more or less jets you can choose the jet panels that will provide your favourite type of massage.

LOUNGE CONCEPT

**DESIGN STEP**

Portcrl's contemporary design is reflected in our bespoke access steps. Designed and built by us with the same care and attention to detail as your spa, these solid surface and aluminium steps are available in matching colours and provide a grand entrance to your Spa.

PRIME, LOUNGE CONCEPT, DOUBLE

**ISPA**

Your spa can come equipped with true Wi-Fi global remote control, so whether you are in the living room at home, or boarding a plane, you are connected and in control of all the functions on your Prime, ready for your return.

PRIME, LOUNGE CONCEPT, DOUBLE, ZETA

**ADJUSTABLE SEATS**

A Portcrl world exclusive feature - our bespoke Made-to-Measure seating.

We all come in different shapes and sizes, and you wouldn't buy a car with seats that could not be adjusted to fit you - so why buy a spa that won't fit you properly?

Just visit your dealer's showroom and they will ensure your personalised fit. Your order will then be manufactured to that specification. A perfect fit for the perfect experience.

PRIME

**AUDIO SYSTEM B4.1**

The B4.1 Audio system plays music by Bluetooth® wireless technology. There are 4 speakers in the shell plus 1 subwoofer beneath it to bring an incredible 3D surround sound to life. The perfect way to bring music to your spa. The Audio B4.1 is compatible with many audio sources, such as iPads and smartphones.

ALL THE SPAS

**COVERMATTRESS**

You can improve the level of comfort of your Lounge Concept by adding the Cushions and Cover that we have specially designed for it. Choose from 6 different shades to best complement your Spa and surroundings.
