

In order to diagnose a patient with Antiphospholipid Syndrome, it is required that at least one clinical criterion and one laboratory criterion coincide.

**LABORATORY CRITERIA:**

- Anticardiolipin antibodies
- Anti-β2-glycoprotein antibodies
- Lupus anticoagulant

**ABBREVIATIONS:**

APS: Antiphospholipid Syndrome  
 aPTT: Activated Partial Thromboplastin Time  
 IgG: Immunoglobulin G  
 IgM: Immunoglobulin M  
 SD: Standard Deviation
