

**ABBREVIATIONS:**

DIC: Disseminated Intravascular Coagulation  
 QT: Quick Time  
 Sdrm: Syndrome

**MEDICAL CONDITIONS THAT CAN CAUSE DIC:**

- Polytrauma.
- Severe sepsis.
- Severe organ dysfunction (pancreatitis).
- Malignancies (solid tumors, myelo/limphoproliferative disorders).
- Severe obstetric diseases (placental abruption...).
- Vascular anomalies (aneurysms, Kasabach-Merrit Sdrm).
- Severe liver failure.
- Severe immunological reactions.
- Toxicity or severe immunological reactions (bites from certain snakes, transfusion reactions, transplant rejection...)
